Legend

*The service was not used. As a result, no average durations can be reported.

Notes

- Currently, the PSD2 interface is not yet fully used by all third-party service providers as Commerzbank PSD2 API is subject to wide market usage period. As a result, there are larger time windows with little or no usage. The error rate is calculated as the rate of failed requests across all requests. This can lead to high error rates during periods of relatively low usage, even though the service is functionally available.
- On 08.05.2024 there was a bankwide issue all PSD2 services were unavailable. Information provided as soon as the issue has resolved

Legend

* The comparative values for the FCS in the online portal are not given, as this service is not offered in the Commerzbank portal.

Notes

1. The measured values reflect figures of the Online Banking Portal (Web Access) and are based on the process of obtaining the same information from the PSD2 interface. The KPIs do not reflect the actual performance of the entire Commerzbank online portal, but rather reflect the comparable end-to-end process of the 1. respective service to the PSD2 interface
2. Since the respective services do not differ between online and mobile banking, in terms of back-end processing and thus the measuring points, we do not disclose the statistics separately.
3. Within maintenance windows, customer processes may not be finalized and end in time-outs. These increased process durations are included in the reported figures.
4. Figures for downtimes also include maintenance work, time windows with significant failure response rates, and significantly increased average durations. Maintenance work usually takes place in time slots with very little customer usage. This can lead to high error rates during periods of relatively low usage, even though the service is functionally available.
5. On 04.05.2024 there was an issue with the login to the Online Banking
5. On 08.05.2024 there was a higher error rate due to log in issues to the PK Portal
6. On 31.05.2024, higher error rate was reported due to issues in the PK Portal and its response time
